TO PREVENT KICKING.

How to Cure Horses of a Victors Mabit That Usually Is the Direct Result of Lileness.

Kicking in the barn is generally done by horses kept idle too long or because of viciousness. Severe injury may result, especially in winter, when horses are kept sharply shod. The illustration shows how to prevent kicking. Put shackles on each of the hind legs and chain them together. Give

TO CURE KICKING HORSES.

horses sufficient liberty to step about and to lie down and get up. The shackles should be put on horse a week before putting on sharp shoes, so as to get the horse accustomed to them that he may not hurt himself. Selfcalking is about the only injury to be feared from using shackles. It is best to use them on horses only in the day "Aye, my boy-bless bim. He's a time at first. Shackles should be of a great lad. Well, I settled down in strong strip tied around each leg above England, in a good, sizeable village. the ankle joint. Use a light but strong chair about 12 inches long with a small ring attached to each end to pass strap through. A double leather strap for coupling instead of a chain may be used if preferred.—Louis Olsen, in He turned his face away for a mo-Farm and Home. ment to conceal its quivering. "The

WAYS OF THE SHEEP.

In Many Respects the Most Interesting, as Well as the Most Profitable, of Form Asimals.

The sheep is a most interesting and entertaining animal. It has interrogating eyes, careful step and a plead-Innocence shines in a lamb's face peace and harmlesaness live in his in-

telligent eyes. Quick to discern danger, the sheep is often unwise in his movements to

avoid it. Proud of her offspring, the experienced ewe proves her devotion and maternal affection by keeping It near her side when passing through strange gates.

The sheep appreciates generous attention and manifests his fondness of it by smiling at the feed basket.

There is a strange affinity between So she bustled about tidving up the the sheep and the always neat little house and looking latter sometimes dines on an innocent into the glass to give some touch of im- lamb, where the dog has been intellithey play together for hours without oung eyes.

The mother wandered around rest- do this the dog must exercise more islessly, going again and again to the telligence than the sheep.-Farmers' door and looking out toward the hills. | Voice.

Harness Goes with Horse Whenever a horse is sold the harness in which it has been used to working ought always to go with the bargain. No two harnesses fit alike, especially where the pressure comes on the shoulder or neck in drawing. The skin under the old harness has been gradually toughened by the pressure on one spot. But with the new harness the pressure is shifted. it may be only an inch or two, but it comes where the skin is tender and will quickly break when exposed to the collar. If the whole harness cannot go, be at least sure to secure the collar with any new horse purchased so the animal can work without be ing tortured. The collar once used for one horse ought never to be used for another.—Midland Farmer.

How to Prevent Black Leg. The cause of "black leg" in cattle is the bacillus anthracis, a vegetable might often be-seek walking together organism. This bacinus establishes on the road near the cottage, and late the diseases known as authrax, which occurs in various forms, such as splenic roses bloomed on the faded cheeks, and apoplexy, gloss anthrax, carbuncular the sad eyes grew calmer, though reaerysipelas, etc. The term "black leg" is used for the disease occurring in swollen glands, aching muscles and benes, the disease is mading rapid headway, and far worse symptoms will follow unless the blood is all two-year-olds and under from the pasture where disease started .- Rural World.

Eggs in the Early Spring. Eggs have brought good prices this winter, and they give more profit in proportion to the cost of the materials entering into their composition than any other animal product on farms. If the flock is large and but few eggs are seeured, it may be due either to too much grain, a lack of animal food or to having too many hens for the space oc-cupted. It is a mistake to keep more simply to wait for the warm weather of spring for them to begin laying. Cut out all the unprofitable members of the flock. with a leastleville

Official Life Attractive in Italy. One of the chief burdens unde which Italy is groaning is the enor mous army of government function-aries, says a Roman correspondent. There is a flerce competition for even the most insignificant posts in the civil service, and every examination is attended by thousands of competitors, all eager to have a part, however small, in the great machine of government. Quite recently 100 vacancies in the postal administration had to be found. Although the salaries offered were only £4 per month, no fewer than 38,00 waluable information about eardidates presented themselves. As with full directions for self-it was impossible to find a half-large we charge nothing for media enough to hald this immense conceurs.
